

Quick Start Instructions:

- 1) Insert the flash drive or CD.
- 2) From the start menu choose Run.
- 3) Type d or f:\setup.exe (substitute the appropriate letter for the device used).
- 4) Click OK.
- 5) Follow the instructions on the screen.

FOR NETWORK INSTALLS ONLY:

- 1) You **MUST** load the software from a remote workstation, **NOT** directly on the server.
- 2) You **MUST** map the network drive on all users computers. Calling the software through a UNC will not function properly.
- 3) When a new user wants to log into Standard-Ease from their computer, they must first run the tb90run.exe found in the folder on the network drive where Standard-Ease is loaded. They only need to do this once, it will load the files needed on their computer to access Standard-Ease.

Now you must activate the software before running.

PRODUCT CODE: PROVIDED WITH SOFTWARE

Activating the Software Automatically:

- 1) Your computer must have access to the Internet to use this feature.
- 2) From the start menu choose Programs...Y14.5 Standard-Ease ...Actman.exe.
